An Advanced Approach to Hyaluronic Acid Delivery

Hyaluronic Acid is a naturally occurring component of joint fluid and connective tissue. B-Luron is formulated using a specialized hyaluronic acid-chondroitin complex designed to support joint lubrication and mobility.*

Based on research and
formulation work of Dr.
Nils Dusek

Unique Formulation
Technology

Designed for whole body joint support through oral
delivery*

Innovative Hyaluronic Acid Design

Developed using advanced formulation techniques, this hyaluronic acid is designed to support efficient absorption and utilization in the body.

This approach helps deliver hyaluronic acid in a form intended to support its natural role in skin, joint, and connective tissue health.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Hyaluronic acid and chondroitin are combined into a hyaluron–chondroitin complex (HCC).

1

Intake

After ingestion, the hyaluron–chondroitin complex reaches the intestines, where absorption begins*

2

Absorption

Absorbed components enter normal circulation and are distributed throughout the body, including joint tissues*

Absorbed

3

Distribution

Molecules are absorbed and distributed through normal circulation to joint tissues*

4

Support

The hyaluron–chondroitin complex supplies hyaluronic acid and chondroitin to help support joint lubrication and joint comfort.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

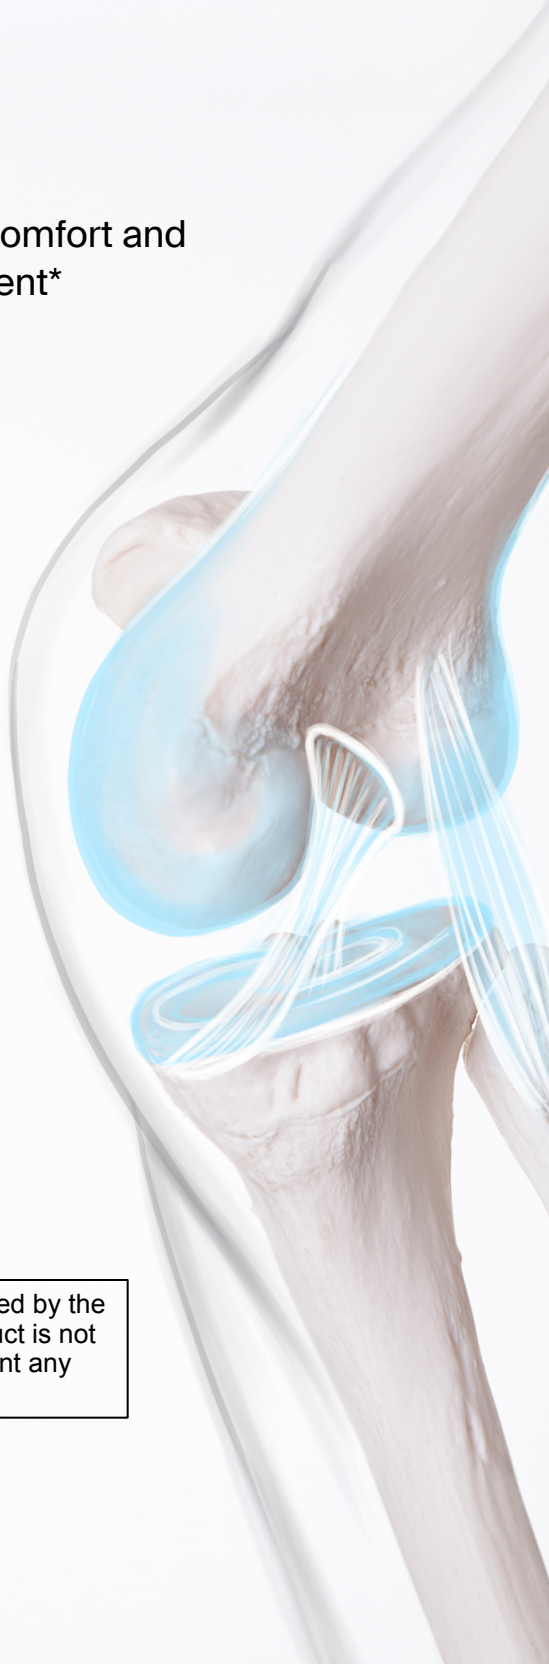

Clinical research has evaluated the hyaluronic acid–chondroitin complex used in B-Luron.*

Supports joint comfort and ease of movement*

Supports joint lubrication and flexibility*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

B-Luron is ideal for those who:

Spend long hours standing*
(increased load on knees and ankles)

Work primarily sitting*
(postural load on the spine and neck)

Exercise intensively or play sports*
(repetitive joint use)

Wear high heels, lift heavy objects, or
carry extra weight*
(overall joint load)

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

B-Luron Ingredients

One serving (1 fl oz / 30 ml) contains:

Chondroitin
sulfate

300 mg

Hyaluronic
acid

150 mg

Helps support joint comfort and ease of movement over time*

B-Luron

Life in motion—
move freely with joint support*

Synergy of hyaluronic acid and chondroitin to support cartilage integrity*

Supports joints throughout the entire body —all at once*

Guided by clinical research*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
